

Queen Mary's SCHOOL

Coronavirus (Covid-19): Queen Mary's School Risk Assessment September 2021

Queen Mary's School takes its responsibilities to students, staff, visitors and the local community, extremely seriously. The wellbeing, health and safety of our community has been central to our planning. This Risk Assessment explains the actions our school leaders should take to reduce the risk of transmission of coronavirus (COVID-19) in the school. This Risk Assessment includes public health advice, endorsed by Public Health England (PHE).

Overview

In accordance with the [DFE Schools COVID-19 operational guidance](#), this Risk Assessment outlines the measures to be in place in our School from September 2021, unless an outbreak should occur

The government will continue to manage the risk of serious illness from the spread of the virus. This marks a new phase in the government's response to the pandemic, moving away from stringent restrictions on everyone's day-to-day lives, towards advising people on how to protect themselves and others, alongside targeted interventions to reduce risk. As COVID-19 becomes a virus that we learn to live with, there is now an imperative to reduce the disruption to children and young people's education - particularly given that the direct clinical risks to children are extremely low, and every adult has been offered a first vaccine and the opportunity for two doses by mid-September.

Our priority is to deliver face-to-face, high quality education to all pupils. The evidence is clear that being out of education causes significant harm to educational attainment, life chances, mental and physical health. The School is aware of the legal responsibilities of providers in taking steps to reopen. The School has duty of care towards staff, students and visitors, including under the Health and Safety at Work etc. Act 1974 and the Equality Act 2010. The School will continue to comply with those obligations.

- **Outbreak management plan**

Queen Mary's School has a full Outbreak Management Plan set in place to ensure the safety of children, staff and visitors to the school. We will only implement some, or all, of the measures in this plan in response to recommendations provided by our local authority (LA), directors of public health (DsPH), Public Health England (PHE) health protection team or with national government guidance.

It may be necessary to implement some or all of these measures in the following circumstances, for example, to help manage a COVID-19 outbreak within the school.

- **Mixing and bubbles**

We will no longer recommend that it is necessary to keep children in consistent groups ('bubbles').

As well as enabling flexibility in curriculum delivery, this means that assemblies can resume, and there is no longer the need to make alternative arrangements to avoid mixing at lunch.

Queen Mary's School Management Plan covers the possibility that it may become necessary to reintroduce 'bubbles' for a temporary period, to reduce mixing between groups.

Any decision to recommend the reintroduction of 'bubbles' will not be taken lightly and we would take account of the detrimental impact they can have on the delivery of education

- **Tracing close contacts and isolation**

Close contact will be identified via NHS Test and Trace and education settings will no longer be expected to undertake contact tracing.

Children under the age of 18 years old will no longer be required to self-isolate if they are contacted by NHS Test and Trace as a close contact of a positive COVID-19 case.

- **Face coverings**

Face coverings will no longer be advised for pupils, staff and visitors either in classrooms or in communal areas. However, should a member of staff / visitor or child choose to wear a face covering, then that is their personal choice to do so and the school will support this.

Face coverings will still be required when using school transport.

Queen Mary's School Management Plan covers the possibility that it may become necessary to reintroduce face coverings for a temporary period in communal areas.

- **Stepping measures up and down**

Queen Mary's School Management Plan outlines how we would operate if there was an outbreak in a school or in the locality.

- **Hand hygiene**

We will continue to promote frequent and thorough hand cleaning, using soap and water or hand sanitizer.

Hand sanitiser is available at entry points to the school and within boarding

- **Respiratory hygiene**

We will continue to promote the 'catch it, bin it, kill it' approach.

- **Use of personal protective equipment (PPE)**

The use of PPE is no longer required beyond what you would use for your normal work

- **Maintain appropriate cleaning regimes**

An appropriate cleaning schedule will be in place to ensure regular cleaning of areas and equipment with a focus on frequently touched surfaces.

- **Keep occupied spaces well ventilated**

When the school is in operation, it is important to ensure it is well ventilated and that a comfortable teaching environment is maintained.

Opening external windows will be considered (weather and temperature dependent) alongside the opening of internal doors to assist with the throughput of air.

- **If an individual develops Covid 19 symptoms or has a positive test result**

Pupils, staff and other adults should follow public health advice on when to self-isolate and what to do. They should not come into school if they have symptoms, have had a positive test result or other reasons requiring them to stay at home due to the risk of them passing on COVID-19 (for example, they are required to be quarantined).

Anyone in school who develops COVID-19 symptoms, however mild, will be sent home and they should follow public health advice.

If a pupil is awaiting collection, they should be left in a room on their own if possible and safe to do so. A window should be opened for fresh air ventilation if possible. Appropriate PPE should also be used if close contact is necessary. Any rooms they use should be cleaned after they have left.

All staff to keep up to date and follow the latest government and national public health guidelines. <https://www.gov.uk/coronavirus>

- **Asymptomatic testing**

There is no need for primary age pupils (those in year 6 and below) to test over the school period.

Year 7 and above pupils will be tested twice on their return to school and continue to home test twice weekly.

Staff should undertake twice weekly home tests whenever they are on site until the end of September, when this will also be reviewed.

- **Confirmatory P.C.R test result**

Staff and pupils with a positive LFD test result should self-isolate in line with the stay at home guidance.

They will also need to get a PCR test to check if they have COVID-19.

Whilst awaiting the PCR result, the individual should continue to self-isolate.

If the PCR test is taken within 2 days of the positive lateral flow test, and is negative, it overrides the self-test LFD test and you can return to school, as long as the individual doesn't have COVID-19 symptoms.

- **Clinical extremely vulnerable children**

All CEV children and young people should attend their education setting unless they are one of the very small number of children and young people under paediatric or other specialist care who have been advised by their GP or clinician not to attend.

Children's health care plans to be updated and instruction from professionals followed.

- **Admitting children into school who display symptoms**

In most cases, parents and carers will agree that a pupil with symptoms should not attend the school, given the potential risk to others.

If a parent or carer insists on a pupil attending school, the head can take the decision to refuse the pupil if, in their reasonable judgement, it is necessary to protect other pupils and staff from possible infection with COVID-19.

- **Attendance**

School attendance is mandatory for all pupils of compulsory school age and it is priority to ensure that as many children as possible regularly attend school.

Where a child is required to self-isolate or quarantine because of COVID-19 in accordance with relevant legislation or guidance published by PHE or the DHSC they should be recorded as not attending in circumstances related to coronavirus.

Where they are unable to attend because they have a confirmed case of COVID-19 they should be recorded as this.

- **Travel and quarantine**

Parents and children travelling abroad should bear in mind the impact on their child's education which may result from any requirement to quarantine or isolate upon return.

Current government guidance and national guidelines to be followed and PCR testing regime to be adhered to and reported as per guidelines.

<https://www.gov.uk/government/publications/covid-19-specified-countries-and-areas>

- **Remote education**

If a child is isolating because they have tested positive but are fit and well, the School should continue to deliver remote education.

The remote education provided should be equivalent in length to the core teaching pupils would receive in school.

- **Education recovery**

The school has a plan in place in regards to ensuring children catch up on their missed education during the pandemic.

- **Staff / Pupil wellbeing and support**

We are aware that some children will be experiencing a variety of emotions in response to their own experiences of COVID, such as anxiety, stress, low mood, bereavement and we have robust measures in place to allow them access to the support that they need.
